

John Paul M. Naag

Cavite State University Trece Martires City Campus • Trece Martires City, Cavite, 4109 • johnpaulnaag10@gmail.com • 09531771034

Information Technology graduate with hands-on experience in full-stack web and mobile application development through internship and academic projects. Worked with technologies including React.js, React Native, Node.js, TypeScript, and Database to develop academic and internship projects. Passionate about software development, problem-solving, and continuous learning.

Education

Cavite State University, Trece Martires City Campus
Bachelor of Science in Information Technology

Trece Martires city, Cavite
2022 – 2026

Experience

Internship experience

Full Stack Developer

StartupLab

February 2026 – April 2026

- Developed and maintained a web-based Point-of-Sale (POS) and task management system used by business clients.
- Diagnosed, troubleshooted, and resolved system bugs to ensure smooth functionality.
- Implemented role-based access control (RBAC) and basic audit mechanisms to enhance security and prevent unauthorized actions.
- Managed and maintained the database, including data integrity, updates, and basic optimization.
- Managed and configured hosting environments, ensuring system availability and performance.
- Collaborated with developers using Git and GitHub to manage source code and streamline development workflows.
- Coordinated with clients to gather requirements, provide updates, and address concerns.
- Documented technical issues, solutions, and system configurations for future reference and maintenance.

Rescuenect: Disaster risk management system

CVSU

Full Stack Developer (Capstone project)

June 2025 – January 2026

- Designed, developed, structured, and implemented a full-stack capstone system from planning to deployment.
- Built backend services using Node.js and frontend applications using React.js and React Native.
- Designed and structured the database schema to support system features and data relationships.
- Analyzed system requirements and applied logical problem-solving to develop effective solutions.
- Implemented authentication, database integration, and REST API communication to support core system functionalities.

Technical Skills

- **Programming Languages & Frameworks:** HTML, CSS, JavaScript, Node.js, PHP, Laravel, Next.js, React.js, React Native, Typescript
- **Databases:** MySQL, MongoDB, Firebase, Supabase
- **Hosting:** Vercel, Render, Hostinger
- **CSS Frameworks:** Bootstrap, Tailwind CSS,
- **Networking & Virtualization:** Cisco Packet Tracer, VirtualBox
- **Design & Tools:** Adobe XD, Figma, VS Code, Git, GitHub, Android Studio, Postman, RESTful APIs

Skills & Links

Skills: Communication, problem-solving, and clean architecture standards.

Language: Filipino/English
