EDUCATION

CAVITE STATE UNIVERSITY – TRECE MARTIRES CAMPUS

Trece Martires City
2026

BS Information Technology

General Weighted Average (GWA): 1.81 (Best Paper in Developmental Category); Dean's Lister, 2025

Relevant Coursework: Data Structures & Algorithms, Database Systems, Networking, System Maintenance, Web Development

WORK EXPERIENCE

STARTUPLAB BUSINESS CENTER & AI CONSULTING AGENCY

General Trias, Cavite
Feb 2026 – Apr 2026

Full Stack Web Developer (Intern)

- Developed and maintained a POS and task management platform used by business clients, improving workflow automation and reducing manual task tracking.
- Integrated the OpenAI API to power automated multilingual text generation, copy refinement, and smart assistant capabilities.
- Connected Google Calendar, Google Meet, and Zoom APIs via Server-to-Server OAuth to automate meeting scheduling and deadline synchronization.
- Collaborated with developers using Git and GitHub to manage source code and streamline development workflows.

FREELANCER

Trece Martires, Cavite
Aug 2026 – Present

Full Stack Web Developer

- Developed a web-based barangay document management system that streamlined the processing, tracking, and management of government-related documents and requests.
- Built and shipped REST APIs in Laravel; used React Typescript for frontend and created responsive and interactive UI.
- Managed and configured hosting environments, ensuring system availability and performance.
- Designed and documented the system architecture, technical workflows, and implementation processes to support maintainability, consistency, and future development.

PROJECTS

RESCUENECT: DISASTER RISK MANAGEMENT SYSTEM (Web & Mobile app)

2025

- Developed a React Native mobile application that visualizes disaster-prone areas and identifies the safest routes and nearest evacuation centers using the Mapbox Maps API.
- Developed an administrative web dashboard for managing disaster-related data and API integrations.
- Awarded Best Capstone Project in Developmental Category (batch 2026)

LIKHA DOCS: AI BASED NARRATIVE REPORT BUILDER

2026

- Integrated AI-assisted writing features to help users generate and refine professional narrative report content.
- Architected and integrated PayMongo payment gateways to automate subscription billing, webhook handling, and premium tier provisioning.
- Deployed and used by CvSU students for preparing OJT narrative reports, validating the platform through real-world student usage.

DEVVENTORY: LOCAL-FIRST DEVELOPMENT WORKSPACE (Desktop app)

2026

- Built a local-first desktop development workspace using React, TypeScript, Tauri v2, and Rust for managing project assets, files, environment variables, and configurations.
- Implemented filesystem integration, file watching, project-scoped validation, and environment tracking to manage development resources directly from the local machine.
- Designed secure local data management with database migrations and session-based credential vault protection, keeping sensitive values isolated from application search and validation workflows.

ACTIVITIES

EGOV HACKATHON

BGC Taguig
July 21-22, 2026

Top 30 finalist

- Developed an AI agent for automating document processing and government-related workflows using the eGov API.
- Integrated the eGov API to enable the application to interact with government services and process relevant data.
- Presented the application and defended its technical implementation during Q&A, placing in the Top 30 among 137 participating teams.

AWS WORKSHOP

BGC Taguig
August 14, 2026

- Participated in an AWS workshop focused on Amazon Q, gaining hands-on experience with AI-assisted development and cloud-based workflows.
- Applied the concepts learned by implementing Amazon Q in a practical development task to explore AI-assisted coding and application development.

ADDITIONAL

Programming Languages: JavaScript, TypeScript, PHP, Rust, HTML/CSS

Frontend: React, Next.js, React Native, Tailwind, Bootstrap

Backend: Node.js, Laravel, REST APIs

Database/Cloud: MySQL, Firebase, Supabase

Desktop/DevOps: Tauri v2, Docker, Git

Certifications: Software Development Lifecycle Fundamentals.

Languages: English, Filipino
